

# HOLISTIC GRAZING PLANNING

## WORKSHOP FOR RANCHERS

**March 8-9, 2010, 8:30a.m.-4 p.m.**  
 Norton Hall, 70 Cottonwood St., Woodland, CA

Allan Savory's  
**HOLISTIC GRAZING PLANNING**  
**Learn Why and How**

**Day 1- Monday, March 8th**

- **OVERVIEW of Holistic Management and Planned Grazing- principles and new tools that work**
- **Financial and conservation SUCCESS STORIES from Australian ranches, including Mediterranean annual grasslands**
- **What's happening in California**
- **Why some attempts fail; how to ensure success**

**Day 2- Tuesday, March 9th**

- **HANDS-ON: Ranchers will learn how to plan grazing that benefits land, people, and finances. Bring map (names/number and area of pastures), stock numbers, classes, # of herds, calculator, pencil and eraser. Day 2 is limited to 20 people.**

### SPECIAL GUEST INSTRUCTOR

#### Australian Rancher, Brian Marshall

**Certified Educator in Holistic Management**

Brian Marshall, an Australian rancher and farmer since 1976, is a cattle & sheep grazer- managing holistically at "Tara" Guyra, in the northern tablelands of New South Wales with experience in dryland & irrigated cropping, sheep & wool, beef cattle and direct beef marketing enterprises. He will be joined by Richard King, USDA NRCS, in leading this two-day training on Holistic Grazing Planning. Developed by Allan Savory, Holistic Grazing Planning can enable ranchers to manage their land, animals, and wildlife so that:

- In the growing months the land can produce the maximum amount of high quality forage on an increasing or sustained basis
- In the non-growing months there is adequate forage and/or cover for livestock and wildlife
- Droughts can be dealt with effectively
- The nutritional requirements of the livestock and wildlife are adequately met
- There is minimal stress on the animals from physical handling, as well as on the ranchers
- There is maximum coordination with cropping, wildlife needs, and other land uses, as well as with the personal schedules of those who will operate the plan.
