

FIELD TOUR

CARBON FARMING: THE MARIN CARBON PROJECT

May 21, 2014 (9:00 AM to 4:00 PM)

Petaluma, CA

The field tour will provide participants with an understanding of the foundational science and research findings of the **MARIN CARBON PROJECT** relative to management practices that enhance the environmental benefits (i.e. ecosystem services) that rangelands provide including:

- ❖ increased forage production
- ❖ increased soil carbon sequestration
- ❖ improved water cycling

Space is limited. Please RSVP to Pelayo Alvarez pelayo@carangeland.org. For more information on the Marin Carbon Project visit their website at www.marincarbonproject.org.

Partners: Marin Carbon Project, California Rangeland Conservation Coalition, Marin Agricultural Land Trust, NRCS, Marin RCD, CALCAN, EDF.
